Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 52, 61, 65-68, 70, 74, and 75 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Roos (4,116,198). Applicant's attention is directed to the Figure 1 embodiment and column 5, lines 21-30.

Claims 52, 55-58, 61, 63, 65, 67-70, and 74 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Doss (4,381,007). Applicant's attention is directed to the Figure 7, in particular, and column 3, lines 29-67.

Claim Rejections - 35 USC § 103

Claims 53 and 54 are rejected under 35 U.S.C. 103(a) as being unpatentable over Roos (4,116,198). The particular dimensions are within the scope of the Roos disclosure since the active and return electrodes are closely spaced. Accordingly, it would have been obvious to the skilled artisan to employ such spacing.

Claims 53, 54, and 66 are rejected under 35 U.S.C. 103(a) as being unpatentable over Doss (4,381,007). The particular dimensions are within the scope of the Doss disclosure since the active and return electrodes are closely spaced. Accordingly, it would have been obvious to

Art Unit: 3739

the skilled artisan to employ such spacing. The particular materials are well known and within the skill of the artisan to select to optimize performance of the method.

Claims 71-73 are rejected under 35 U.S.C. 103(a) as being unpatentable over Doss (4,381,007) in view of Knowlton (5,871,524). The Doss reference fails to disclose feedback control of the power generator. Knowlton discloses a similar device employing feedback based on impedance and temperature sensing. The addition of such a feature to Doss would have been obvious to the skilled artisan to better control the application of power to the electrodes for superior performance and patient safety.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 52-75 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-62 of U.S. Patent No. 5,891,095. Although the conflicting claims are not identical, they are not patentably distinct from each other because they represent an obvious change in scope of the same method.
